

IEEE/ISPRS workshop  
**Computer Vision for Remote Sensing  
of the Environment**

November 7, 2011  
(in conjunction with ICCV 2011, Barcelona, Spain)

**Aims and Scope**

Computer vision could make important contributions to the analysis of remote sensing imagery. The workshop aims to bring together computer vision and remote sensing researchers to discuss these exciting new possibilities. The event is organized jointly between IEEE CS, IEEE GRSS and ISPRS Commission 3.

**Paper Submission:** *July 8, 2011*

Submitted manuscripts shall be full papers (up to 8 pages IEEE style, see webpage) and will be subject to a double-blind review process. The proceedings will be published by IEEE on the DVD proceedings of ICCV 2011, and will be available in IEEE Xplore.

**Organizers**

Konrad Schindler, ETH Zürich  
Wolfgang Förstner, Bonn University  
Nicholas Paparoditis, Institut Géographique National
