Information for Authors

Subject Matter: The IEEE JOURNAL OF SELECTED TOPICS IN APPLIED EARTH OBSERVATIONS AND REMOTE SENSING (hereafter referred to as J-STARS) is a bimonthly publication for applied papers on remote sensing and earth observations. Papers should address current issues and techniques in applied remote and *in situ* sensing, their integration, and applied modeling and information creation for understanding the Earth. Applications are for the Earth, oceans and atmosphere. Topics can include observations, derived information such as forecast data, simulated information, data assimilation and Earth information techniques to address science and engineering issues of the Earth system. The technical content of papers must be both new and significant. Experimental data must be complete and include sufficient description of experimental apparatus, methods, and relevant experimental conditions.

Submitting Papers: Authors are required to submit electronically using the website http://mc.manuscriptcentral.com/jstars. Instructions for creating new user accounts, if necessary, are available on the login screen. No other manners of submission are being accepted. Papers should be submitted in double column, single-spaced format. For questions concerning the process, or for assistance with the submission, please write to jstars-editor@ieee.org, or by fax to +1–732–562–0545.

Style: J-STARS is addressed to readers with a wide variety of interests. The author should refrain from using terminology that may not be familiar to readers and carefully explain terminology that is used. In addition, the author should provide brief introductory remarks and references that will permit the reader to relate the paper to other work in the author's field of specialty. Clarity of both writing and illustrations is required. J-STARS is published only in English, and the use of correct English is required of all authors. Thus, contributors for whom English is not a native language should have their papers edited for style, form, grammar, and spelling suitable for publication prior to submittal to J-STARS. Papers should be accompanied by brief biographies and clear photographs of the authors.

Submission of a manuscript is assurance that it has not been copyrighted, published, or accepted for publication elsewhere; that it is not currently being considered for publication elsewhere; and that it will not be submitted elsewhere while under consideration by J-STARS, unless the author states otherwise.

Writing/Preparing Abstracts: The abstract must be a concise yet comprehensive reflection of what is in your article. In particular:

- The abstract must be self-contained, without abbreviations, footnotes, or references. It should be a microcosm of the full article.
- The abstract must be between 150–250 words. Be sure that you adhere to these limits; otherwise, you will need to edit your abstract accordingly.
- The abstract must be written as one paragraph, and should not contain displayed mathematical equations or tabular material.
- The abstract should include three or four different keywords or phrases, as this will help readers to find it. It is important to avoid over-repetition of such phrases as this can result in a page being rejected by search engines.
- Ensure that your abstract reads well and is grammatically correct.

Graphical Abstract: This journal accepts graphical abstracts and they must be peer reviewed. For more information about graphical abstracts and their specifications, please visit the following link: http://www.ieee. org/publications_standards/publications/graphical_abstract.pdf

References and Figure Captions: References must be in IEEE style, which is as follows:

Papers:	J. K. Author, "Title of paper," *Title of Journal*, vol. *n*, no. *n*, pp. *nnn–nnn*, month, year.
Books:	J. K. Author, *Title of Book*. Location of Publisher: Name of Publisher, ch. 1, pp. *nnn–nnn*

Figure captions should be sufficiently clear so that the figures can be understood without detailed reference to the accompanying text. Axes of graphs should have self-explanatory labels, not just symbols (e.g., Electric Field rather than E).

Illustrations and Tables: Graphics file names should be lower case and named fig1.eps, fig2.tif, etc. Supported graphics types are EPS, PS, TIFF, or graphics created usingWord, Powerpoint, Excel or PDF. Not acceptable is GIF, JPEG, WMF, PNG, BMP or any other format (JPEG is accepted for author photographs only). The provided resolution needs to be at least 600 dpi (400 dpi for color).

Page Numbers: Number *all* pages, including illustrations (which should be grouped at the end), in a single series with no omitted numbers. Identify figures by number and author's name.

Review Process: Papers are usually reviewed by at least three qualified referees. A decision is made on the disposition of a manuscript, and the author is notified of the decision.

Open Access: This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted $1,950 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once themanuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission.

Page Charges and Color Figures: A mandatory *Excessive Paper Length* charge of $230.00 per page (beginning with page 7 and beyond) is required for papers in excess of six (6) printed pages. The price for GRS Society members is $200.00 per page. The author will be notified of the estimated paper length upon receipt of the original manuscript. The author will be requested, conditional upon favorable technical review, to pay an optional sustaining page charge of $110 per printed page to cover the cost of publication of the first six pages. There will also be mandatory charges for color figures of $275 per color figure printed. Authors are encouraged to seek institutional support for all page costs. Authors who cannot pay mandatory charges will be required to reduce their manuscripts to six printed pages or less prior to final acceptance and scheduling for publication. This reduction will occur after technical review of the manuscript. The above policy has no relationship to requests by the Editor to reduce very long manuscripts prior to technical review.

Author Names in Native Languages: IEEE supports the publication of Chinese, Japanese, and Korean (CJK) author names (including non-Latin languages) in the native language alongside the English versions of the names in the author list of an article. Chinese authors may use either Simplified or Traditional characters. Authors must provide the native language name in unicode characters to be displayed in the byline of the article, in parentheses, after the English version of the name. For more information, please visit the IEEE Author Digital Tool Box at the following URL: http://www.ieee.org/publications_standards/publications/authors/auth_names_native_lang.pdf

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with the U.S. Copyright Law, authors are required to submit an IEEE copyright transfer form before publication. J-STARS has moved to an all-electronic copyright system. The form can be found in the corresponding author's Manuscript Central author center after the paper has been accepted. It should be completed by clicking the "Copyright Submission" button next to the title of the accepted paper. It returns to the authors and their employers full rights to reuse their material for their own purposes.

ORCID Required: All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. ORCID is a persistent unique identifier for researchers and functions similarly to an article's Digital Object Identifier (DOI). ORCIDs enable accurate attribution and improved discoverability of an author's published work. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.

Manuscript Submittal Checklist: Number *all* pages of a manuscript in a single series with no omitted numbers; edit manuscript for correct English usage; provide complete mailing address, telephone, and FAX numbers of corresponding author (include country and city codes); brief biography and photo for each author.

While the list of processing programs acceptable to IEEE electronic production is almost endless, there are preferred programs that enable the preservation of the greatest amounts of information. TeX and LaTeX are preferred. An IEEE LaTeX style file, *IEEEtrans.sty*, is obtainable by authors who e-mail a request to help@ep.ieee.org. The following points are important to remember when submitting electronic manuscripts in TeX and LaTeX. 1) Include all macros (\def) that are required to produce your document. 2) IEEE TRANSACTIONS style dictates a 21-pica (3.5-in) column width. If mathematical phrases are produced with this in mind, they are apt to appear aesthetically pleasing in the final version. It is suggested that authors keep user-defined macros to a minimum.
