

# Boston July '08 Meeting

## International Spaceborne Imaging Spectroscopy Working Group (ISIS WG)

Goals for the WG are to foster increased synergy and interoperability among future international imaging spectroscopy (hyperspectral) missions, their associated ground-segments, and to maximise uptake by the earth observation user community.

**Location: IGARSS08, Boston, USA, July 11, 2008**

**July 11, 2008**

Time	Topic	
<b>SESSION 1: Opening and Update on Missions</b>		
14:30	Welcome, Introductions and review of actions	A. Held (CSIRO)
15:00	Agency Updates on Current and Future Space-based Imaging Spectroscopy Missions (Up to ~20 min. each)	(Germany) (South Africa) (USA) (Japan) (Canada) (ESA?) Italy (?) Others ?
<b>SESSION 2: Special Discussion Topics: Cal/Val, Data Interoperability, Instrument Design</b>		
16:30	The German EnMAP Cal/Val Plan	GFZ
16:50	Establishment of Global Imaging Spectroscopy Cal/Val Site Network.	NASA USGS ESA, All
17:20	Data Standards and Mission Interoperability	?
17:40	Sensor Design	?
17:20	Actions, Adjourn, Closing Remarks and Logistics
