

CALL FOR PAPERS

IEEE GEOSCIENCE AND REMOTE SENSING MAGAZINE

Since 2013, the IEEE Geoscience and Remote Sensing Society (GRSS) publishes *IEEE Geoscience and Remote Sensing Magazine*. The magazine provides a new venue to publish **high-quality technical articles** that by their very nature do not find a home in journals requiring scientific innovation but that provide relevant information to scientists, engineers, end-users, and students who interact in different ways with the geoscience and remote sensing disciplines. The magazine publishes **tutorials** and **technical papers** on geoscience and remote sensing topics, as well as papers that describe **relevant applications** of and **projects** based on topics addressed by the GRSS.

The magazine also publishes columns and articles on these topics:

- ▶ Education in remote sensing
- ▶ Space agency activities
- ▶ Industrial profiles
- ▶ Organizational profiles
- ▶ Women in geoscience and remote sensing
- ▶ GRSS Technical Committee activities
- ▶ GRSS Chapter activities
- ▶ Conferences and workshops.

The magazine is published with an appealing layout in a digital format, and its articles are also published in electronic format in the IEEE *Xplore* online archive. The digital format is different from the electronic format used by the IEEE *Xplore* website. The digital format allows readers to navigate and explore the technical content of the magazine with a look and feel similar to that of a printed magazine. The electronic version provided on the IEEE *Xplore* website allows readers to access individual articles as separate PDF files. Both the digital and the electronic magazine content is freely available to all GRSS members.

This call for papers is to encourage all potential authors to prepare and submit tutorials and technical papers for review to be published in the *IEEE Geoscience and Remote Sensing Magazine*. Contributions for any of the above-mentioned topics of the magazine (including columns) are also welcome.

All tutorial and technical papers will undergo blind review by multiple reviewers. The submission and review process is managed at the IEEE Manuscript Central, as is already done for the three GRSS journals. Prospective authors are required to submit electronically using the website <http://mc.manuscriptcentral.com/grs> by selecting the "Geoscience and Remote Sensing Magazine" option from the drop-down list. Instructions for creating new user accounts, if necessary, are available on the login screen. No other manners of submission are accepted. Papers should be submitted in single column, double-spaced format.

The magazine also publishes **special issues**. Readers interested in proposing special issues as guest editors are encouraged to contact the editor-in-chief directly.

For any additional information, contact the editor-in-chief:
